

Your Digital Platform for Lane Risk Assessments
Consolidate - Collaborate - Automate

Do you want to simplify GDP compliance with faster lane qualifications and reduced transport risk?

Your Digital Platform for Lane Risk Assessments

Validaide offers the market-leading application to manage all your Lane Risk Assessments and Lane SOPs in a single digital platform. With Validaide you create a consistent data-driven evaluation of temperature risk, quality risk and security risk for each transport route in your global network, enabled by our unique platform capabilities

Consolidate

Consolidate Lane Risk Assessments in a standard digital format, integrating a variety of data sources and the healthcare handling capabilities from more than 1500 logistics suppliers.

Collaborate

Collaborate with your business partners to share, edit and approve Lane Risk Assessments and SOPs using our unique data sharing and approval workflow capabilities.

Automate

Automate the review, approval and management of Lane Risk Assessments with advanced automation and smart change control features that replace repetitive manual activities.

Benefits of Joining Validaide

The planning of healthcare shipments can result in fragmented data access, repetitive activities, inflexible supply chains, and unnecessary logistics costs and product excursions.

Validaide can help you to be more efficient, more flexible, and reduce shipment incidents.

Simplified GDP Compliance

Consolidate and Standardize LRAs and SOPs in one digital platform with automated workflows to eliminate manual and redundant activities

Improved Supply Chain Agility

Accelerate your Lane qualification process with a data-driven approach and digital collaboration with logistics partners.

Reduced Transport Risk

Ensure product integrity with improved visibility on transport risk throughout your global distribution network.

"Previously we had to manage hundreds of SOPs and Lane Risk Assessments in different formats, now we manage them all in one location, easy to access, easy to approve."

SARTORIUS

Christian Doepke

Manager of Freight Global Solutions

Kim Rosendal
Senior Director - Logistics

"Validaide's diverse community of supply chain stakeholders, allows us to make better-informed decisions and have a strong supply chain overview.."

About Validaide

Validaide is the leading digital platform to optimize and streamline logistics planning for temperature-sensitive pharmaceutical products. Our solution consolidates digital Lane Risk Assessments and Standard Operating Procedures (SOPs) on a central platform to ensure compliance with Good Distribution Practice (GDP) Guidelines.

Validaide combines information from over 1500 logistics suppliers with other data sources to create a comprehensive risk overview per transport route. By facilitating digital collaboration with logistics partners and seamless planning-to-execution workflows, Validaide reduces incidents, improves efficiencies, and enhances flexibility to respond to supply chain disruptions, ultimately improving product quality and safety.

Validaide has implemented comprehensive and effective measures to protect the confidentiality, integrity, and availability of information with ISO 27001:2022.
